

Wireless Charging Pad

Reliable Wireless Charging!

Our wireless charging pad offers a next-generation charging alternative to traditional wired charging. With a low profile and space-saving design, our wireless charging pad can seamlessly remain resting on your desk. Since it has a smart shutoff feature, you can leave it plugged in without the concern of overheating or wasting energy. Stylish and functional rubber accents hold your phone in place while charging. The 5 Watt charging circuit ensures compatibility with most wireless charging-enabled devices. Qi-standard components offer maximum reliability and longevity of use. Our wireless charging pad is available in several color/accent combinations.

No Cables, No Problem!

Features

- Qi-Standard
