

# Dummy Infrared Security Camera

Our dummy infrared security camera is designed to resemble a CCTV infrared security camera, providing anti-theft protection at a fraction of the cost. Included details such as a flashing red LED light and a black power cable to create the illusion of a CCTV infrared camera. Mount the dummy camera on a wall using the included mounting hardware, and use it as a standalone security enhancer. You can also combine the dummy camera with a functional CCTV system to deter intruders.
