

# 3 Pack Universal Smartphone Lenses

## Ultimate Photographer's Experience!

Smartphone cameras are more powerful than ever before. With our universal smartphone lenses, your smartphone's camera will render a point-and-shoot or DSLR camera completely obsolete. Our 3 pack of universal smartphone lenses turns your basic smartphone camera into a wide-angle camera for perfect panorama shots, or a macro camera for crystal-clear close-ups, or even a fish-eye camera for adventure-type photography. As compared with traditional smartphone lenses, which require a permanent adhesive magnet around your camera lens, these lenses simply clip on to your smartphone for damage-free use. Machined from aluminum alloy, the lens bodies are rust-resistant for outdoor use, and the lenses are made of metal oxide-coated glass, which resists surface scratches and eliminates reflections and color distortion. Simply clip the fixture to your phone, and screw on the interchangeable lens to turn your smartphone into a professional camera.

## Professional Quality Pictures Every Time!

### Features

- 3 pack includes wide angle, macro, and fish eye lenses
- Machined aluminum alloy construction
- Clip-on design allows for universal use with single lens smartphones
- Screw on lens design prevents light leakage when installed on the device
- Metal oxide-coated glass lenses are scratch resistant, and prevent unwanted reflections and color distortion
